## Job Description

A suitable candidate has at least 5 years of proven software engineering experience in an Agile/scrum environment and specializes in development of "full-stack" Web application and data processing back-ends using JavaScript/TypeScript, node.js and React. Experience with the Azure ecosystem, Python and data visualization frameworks is a bonus. The selected candidate will join a closely collaborating Scrum team working on health data collection and processing applications and back-ends.

---

## Candidate Description

- We are looking for a Medior/Senior profile (>3 years of proven experience).
- JavaScript/TypeScript developer with a focus on (Azure) cloud-deployed back-ends.
- Python knowledge is a big plus.
- Experience of implementation of node.js back-ends (JavaScript/TypeScript).
- Azure "basics" (Blob storage, event hubs, etc.).
- Azure Functions (node.js).
- PostgreSQL.
- Proficient in English, and (notions) in Dutch (speaking/writing).

Additional:

- Python.
- Experience with data visualization frameworks/libraries (Web-based).
- React.
- Familiar with Scrum process.

---

## We offer

An attractive salary package with extra benefits. A high tech, multicultural and young ambient. A fast track in a growing company. Formation in multidisciplinary environment plenty of learning opportunities.
