

Project Manager Joint Development Supplier Projects

About the company

Qplox is a fast-growing company offering test and automation engineering. Headquartered in Leuven, with offices in Barcelona and Eindhoven.

Our clients are major multinational enterprises and local companies from automotive, semiconductors, RF, consumer electronics.... Our Test automation group offers a one stop shop for design of automated test benches, system integration production, lab automation and data acquisition systems, with a growing focus in IoT sensor networks.

Our consultancy department offers services in RF, semiconductors and electronics design and test, as well as on the crossing roads of Nanotechnology, Bio-Science Engineering and Biotechnology.

Job Description

- You do a first internal assessment of the resources required to execute a research project (lot turns, people, machine time, metrology needs) and ensure a balance between supplier needs and available resources and priorities in collaboration with the technical lead/manager.
- You define a way of working for the project team, consisting of internal and external members (meeting schedule, documentation, and reporting, ...).
- You monitor progress with respect to the approved plan (e.g. keep track of key deliverables, critical lot progress, create and track resource dashboards).
- You make sure overall project status is known and communicated through the proper channels in due time.

Candidate Description

- You can communicate at different levels within the organization.
- You will require a strong capability to work independently.
- You are able to motivate/inspire others.
- You are a problem-solver with a strong focus on efficiency.
- You have a background in project management or in a similar role (5 to 10 years). Knowledge in semiconductor business or similar industry is not a must but is considered to be a plus.

We offer

An attractive salary package with extra benefits. A high tech, multicultural and young ambient. A fast track in a growing company. Formation in multidisciplinary environment plenty of learning opportunities.
