

About the company

Qplox is a fast-growing company offering test and automation engineering. Headquartered in Leuven, with offices in Barcelona and Eindhoven.

Our clients are major multinational enterprises and local companies from automotive, semiconductors, RF, consumer electronics.... Our Test automation group offers a one stop shop for design of automated test benches, system integration production, lab automation and data acquisition systems, with a growing focus in IoT sensor networks.

Our consultancy department offers services in RF, semiconductors and electronics design and test, as well as on the crossing roads of Nanotechnology, Bio-Science Engineering and Biotechnology.

Job Description

The selected candidate will be in charge of the installation of materials to be used in the lithography tool (TRACK). In addition, he/she will be supporting lithography engineers to conduct the R&D projects.

The assignment

- You will be working in the cleanroom on a regular basis.
- You will be responsible for the installation of lithography materials into track.
- Execute lithography process requested by engineers.
- You will collect and interpret data to support advanced patterning program at our client.
- Work on thin film characterization (ellipsometry, contact angle, microscopy etc).
-

Location: Leuven

Candidate Description

- Bachelor's or master's degree (chemistry or material sciences) or equivalent through technical experience
- Communication skills to work successfully in an international dynamic team environment
- Work accurately and have attention to details
- Team player, but you can also plan and organize your work autonomously and you like to take initiative
- Good documentation skills

In addition

- You are flexible and able to deal with change or ambiguity
- To allow you to function in this multicultural environment you are fluent in both written and spoken English
- You are highly organized and have a logical and methodical working style

We offer

An attractive salary package with extra benefits. A high tech, multicultural and young ambient. A fast track in a growing company. Formation in multidisciplinary environment plenty of learning opportunities.
